

Please reject NAB's petition 04-160. I have had XM Radio since it was new to the market. The system is great although it is not free, I feel it is well worth the money that I pay. It is very high quality and I don't have to worry about switching station when I am traveling. I know I will always hear what I want to hear, in most cases without commercials which drive me nuts. I know I can travel from the East Coast all the way to the West Coast without losing signal. I do not have to switch stations and take my eyes off of the road. The information that is given is usually more correct than the local TV/Radio stations offer. I know I can travel to any area and know what is happening, days before I even come close to my destination.

Once again, please reject the petition 04-160
